CUI INC®

SERIES: VRX3-DIP | DESCRIPTION: DC-DC CONVERTER

FEATURES

- 3 W isolated output
- wide input (2:1)
- industry standard 10 pin DIP package
- no heatsink required
- unregulated outputs
- 1,500 V isolation
- short circuit protection
- wide temperature (-40~85°C)
- efficiency up to 80%

RoHS

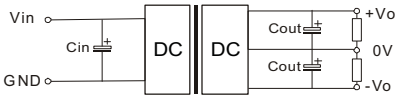
APPLICATION NOTES

1. **Requirement on Output Load**
In order to ensure the product operates efficiently and reliably, make sure the specified range of input voltage is not exceeded and the minimum output load is not less than 10% load. If the actual load is less than the specified minimum load, the output ripple may increase sharply while its efficiency and reliability will reduce greatly. If the actual output power is very small, please add an appropriate resistor as extra loading.

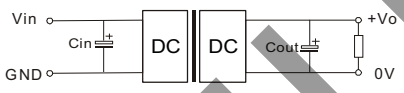
2. **Recommended Circuit**
All VRX3 converters have been tested according to the following recommended testing circuit before leaving the factory. This series should be tested under load, never under no load (Figure 1).

Figure 1

VRA3



VRB3



However, the capacitance of the output filter capacitor must be proper. If the capacitance is too big, a startup problem might arise. For every channel of output, provided the safe and reliable operation is ensured, the greatest capacitance of its filter capacitor see (Table 1).

General:

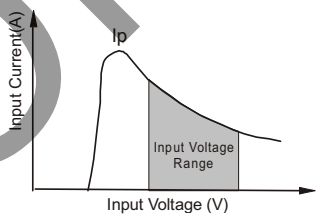
Cin	5, 12 V 24, 48 V	100 µF 10 ~ 22 µF
Cout	10 µF / 100 mA	

Table 1

VRA3 Vout (Vdc)	Cout (µF)	VRB3 Vout (Vdc)	Cout (µF)
±5	680	5	1,000
±9	470	9	680
±12	330	12	470
±15	220	15	330

3. **Input Current**
While using unstable power source, please ensure the output voltage and ripple voltage do not excced indexes of the converter. The preceding power source must be able to provide for converter sufficient starting current Ip.

General: Ip ≤1.4*Iin-max



4. **No parallel connection or plug and play**
