SERIES: AE10-UW | DESCRIPTION: DC-DC CONVERTER

FEATURES
• 10 watts
• high operating temp -40 to +70°C
• 4,000 Vac isolation
• designed to meet UL 1741; EN 62109 approved
• board mounted
• input voltage range of 200~1,500 Vdc
• low ripple & noise
• OVP protection
• output short circuit protection

MODEL

</tr>
</tbody>
</table>

Notes:
1. Measured at nominal input, 20 MHz bandwidth oscilloscope, with 10 µF electrolytic and 1 µF ceramic capacitors on the output.
2. Measured at 800 Vdc input voltage, full load.
3. All specifications are measured at Ta=25°C, humidity < 75%, nominal input voltage, and rated output load unless otherwise specified.

**MECHANICAL DRAWING**

units: mm [inch]
- tolerance: ±0.50[±0.020]
- pin diameter tolerance: ±0.10[±0.004]
- pin height tolerance: ±1.50[±0.059]

In high vibration environments, this series should be mounted with screws.
- tightening torque: max 0.4 N*m

</tbody>
</table>

**Notes:**
1. C1 is a ceramic capacitor used to filter high frequency noise.
2. C2 is electrolytic and is recommended to be high frequency and low resistance. For capacitance and current of the capacitor, refer to the datasheet provided by the manufacturer. Capacitance withstand voltage derating should be 80% or above.
