

**SERIES:** VMS-160 | **DESCRIPTION:** AC-DC POWER SUPPLY

**FEATURES**

- up to 160 W continuous power
- industry standard 2" x 4" footprint
- 18 W/in<sup>3</sup> power density
- universal input (85~264 Vac / 125~373 Vdc)
- single output from 5~48 V
- active power correction (98%)
- 12 V auxiliary fan output
- no minimum load required
- over load, over voltage, and short circuit protections
- full medical and ITE safety approvals
- efficiency up to 90%

| MODEL      | output voltage | output current | output power     | ripple and noise <sup>4</sup> | efficiency |
|------------|----------------|----------------|------------------|-------------------------------|------------|
|            | (Vdc)          | max (A)        | max (W)          | max (mVp-p)                   | typ (%)    |
| VMS-160-5  | 5              | 20             | 100 <sup>1</sup> | 50                            | 90         |
| VMS-160-12 | 12             | 13.3           | 160 <sup>3</sup> | 120                           | 90         |
| VMS-160-15 | 15             | 8              | 120 <sup>2</sup> | 50                            | 90         |
| VMS-160-24 | 24             | 6.66           | 160 <sup>3</sup> | 240                           | 90         |
| VMS-160-48 | 48             | 3.33           | 160 <sup>3</sup> | 480                           | 90         |

- Notes:
1. Total continuous output power will not exceed 100 W forced air (400 LFM), 70 W without fan
  2. Total continuous output power will not exceed 120 W forced air (400 LFM), 90 W without fan
  3. Total continuous output power will not exceed 160 W forced air (400 LFM), 100 W without fan
  4. Measured at 20 MHz, twisted pair with 0.47 μF ceramic and 22 μF tantalum parallel capacitors

**PART NUMBER KEY**

## INPUT

| parameter               | conditions/description   | min       | typ  | max         | units      |
